Third quarter highlights for ongoing businesses

- Revenue was 10.8% ahead of last year, 5.9% at constant exchange rates.
- Gross margin was ahead of last year at 28.4%.
- Trading profit of £230 million was 12.2% ahead of last year at constant exchange rates.
- Foreign exchange movements increased trading profit by £11 million and one additional trading day increased trading profit by £6 million.
- Net debt at 30 April 2016 of £1,131 million after purchasing £252 million of own shares.
- Five bolt-on acquisitions completed in the quarter with total annualised revenue of £23 million.
- Completed sale of Building Materials activities in France on 7 March 2016.

Commenting on the results, Ian Meakins, Chief Executive, said:

“Wolseley generated decent revenue growth in the third quarter in mixed market conditions and against continued deflationary headwinds. The commercial and residential markets in the US held up well and we achieved good volume growth, though this continued to be partly offset by weaker Industrial markets and the ongoing impact of commodity price deflation which reduced the US growth rate by 2.3%. The UK heating market continued to be challenging and we continue to take actions to protect profitability. In the Nordics, after an encouraging first half, construction markets were more challenging in the third quarter. Recent revenue growth trends have been weaker and we have continued to manage costs and productivity very carefully while driving better customer service and strong cash conversion.”

Group results

During the quarter the Group generated revenue from the ongoing businesses of £3,658 million, 5.9% ahead of last year at constant exchange rates and 2.8% ahead on a like-for-like basis including 1.4% price deflation. Trading profit of £230 million was 12.2% higher than last year at constant exchange rates and the trading margin was ahead of last year by 40 basis points at 6.3%. There was one more trading day in the period which represented £6 million of trading profit and there will be one fewer trading day in Q4. Exchange rate movements increased revenue by £153 million and trading profit by £11 million.

(1) ‘Ongoing businesses’ excludes businesses that have been closed, disposed of or are held for sale.

(2) Before exceptional items and amortisation of acquired intangibles.

(3) The increase or decrease in revenue excluding the effect of currency exchange, acquisitions and disposals, trading days and branch openings and closures.

USA

Ferguson, our US business, grew revenue by 5.0% on a like-for-like basis, including price deflation of 2.3%. Blended Branches, Waterworks, Heating, Ventilation and Air Conditioning, Fire and Fabrication and B2C all generated good like-for-like revenue growth. Industrial markets, which represent 13% of Ferguson's revenues, continued to be impacted by weak demand. Gross margins were ahead of last year and operating costs were 6.6% higher at constant exchange rates. Acquisitions contributed another 1.8% of revenue growth. Trading profit of £204 million was £40 million ahead of last year including £9 million due to favourable exchange rate movements. Two bolt-on acquisitions were completed in the quarter with total annualised revenue of £9 million.

UK

Like-for-like revenue in the UK was 0.4% lower than last year. Repairs, maintenance and improvement markets remained weak. Acquisitions contributed a further 2.8% to revenue growth. Gross margins stabilised somewhat and trading profit of £26 million, before £2 million of restructuring costs (year-to-date £5 million), was in line with last year. We are making good progress with the review of the UK operating model and we expect the review to be completed by August.

Nordics

In the Nordic region like-for-like revenue declined 2.6% as adverse weather conditions and the reduction of tax incentives impacted spring sales. Gross margins were weaker with trading profit at constant exchange rates £5 million behind, including £1 million of restructuring costs. The favourable impact of exchange rates was £1 million.

Canada

Like-for-like revenue in Canada was 0.1% ahead. Weakness in the oil price impacted the West, though this was offset by relative strength in the East. Gross margins were weaker and operating costs were flat. Trading profit of £3 million was in line with last year. Two bolt-on acquisitions were completed in the quarter with total annualised revenue of £13 million.

Central Europe

In Central Europe like-for-like revenue declined by 0.2%. Gross margins were slightly ahead and costs were under good control. Trading profit of £4 million was £1 million ahead of last year.

Financial position

Net debt at 30 April 2016 was in line with our expectations at £1,131 million (30 April 2015: £1,127 million). In the year to 30 April we bought back 6.6 million shares for £252 million at an average price of £38.01 per share. The share buyback programme announced in September was completed in May. There have been no other significant changes in the financial position of the Group.

Outlook

Demand in several of the Group's markets remains subdued and we continue to experience the adverse impact of commodity deflation, particularly in the US. Like-for-like revenue growth in the weeks since the end of the quarter has been 1%. We have committed to further restructuring in the UK and Europe bringing the total expected costs for the full year to about £20 million. We expect trading profits for the full year, before restructuring costs, to be in line with analyst expectations at current exchange rates.
